Profile

Aspiring AI Engineer and Product Builder with experience developing AI applications, SaaS platforms, and educational technology solutions. Skilled in Machine Learning, NLP, RAG Systems, Data Analysis, Product Development, and Business Operations. Built and managed StudXAI, an AI-powered EdTech platform serving schools and students. Passionate about building scalable AI products that solve real-world problems.

SKILLS

- **Programming:** Python, SQL, React Native, React, NextJS, Firebase Firestore
- **AI & Machine Learning :** Machine Learning, NLP, Retrieval-Augmented Generation (RAG), Semantic Search, Vector Embeddings, Prompt Engineering, Feature Engineering, Model Evaluation
- **Libraries & Tools:** Pandas, NumPy, Scikit-learn, Matplotlib
- **Data & Visualization:** Power BI, Tableau, Data Analysis, Exploratory Data Analysis (EDA)
- **Development :** Git, GitHub, Jupyter Notebook, VS code, Firebase

EDUCATION

2022- 2026

B.Tech CSE-AIML
Kurukshetra University, Kurukshetra(Haryana)

EXPERIENCE

Founder (StudXAI) *September, 2025 – Present*

- Leading the development and operations of an AI-powered EdTech platform designed for schools, students, teachers, and administrators.
- Managed product strategy, feature planning, platform architecture, and deployment.
- Designed and supervised the development of School ERP modules including student management, attendance tracking, marks management, and teacher administration.
- Developed AI-powered educational tools focused on student learning, AI literacy, and community engagement.
- Coordinated website development, cloud deployment, hosting management, and platform maintenance.
- Conducted market research and identified opportunities in the EdTech and School SaaS industry.
- Built partnerships and outreach programs for schools through meetings, presentations, and software demonstrations.
- Led branding, digital marketing, content strategy, and customer acquisition initiatives.
- Managed complete product lifecycle from ideation to launch and continuous improvement.
- Collaborated with educators and school administrators to design technology solutions addressing real educational challenges.

PROJECTS

StudXAI School ERP & Learning Platform

- **Tech Stack:** React Native, TypeScript, Firebase, Firestore
- Developed a multi-role School Management SaaS platform for students, teachers, school administrators, and super administrators.
- Implemented attendance management, marks management, onboarding workflows, role-based dashboards, and academic management modules.
- Designed scalable Firebase architecture with secure role-based access control.
- Built mobile-first interfaces for educational institutions.

Smart AI Attendance System Using Facial Recognition

- **Tech Stack:** Python, OpenCV, Face Recognition, Firebase, NumPy | Jan 2026 – Feb 2026
- Built an AI-based real-time attendance system using computer vision and facial recognition to automatically identify individuals.
- Developed a backend pipeline for face detection, encoding, and identity verification.
- Integrated Firebase cloud database for attendance storage and efficient record retrieval.

AI Tutor using Retrieval-Augmented Generation (RAG)

Tech Stack: Python, Machine Learning, NLP, RAG, Transformers | Oct 2025 – Nov 2025

- Developed an AI tutoring system that answers questions using Retrieval-Augmented Generation (RAG).
- Implemented semantic search with vector embeddings to retrieve relevant knowledge before generating responses.
- Improved response accuracy by grounding AI outputs in retrieved documents.
-

CERTIFICATIONS

- Data Analytics Job Simulation – Deloitte (Forage)
- Data Science Course – Code with Harry
- Data Analysis with Python – IBM (Cognitive Class)
