

SHIV KUMAR

Software Developer | React Native | Node.js | AI/ML

+91-7082860256 | sujalkumar3489@gmail.com | linkedin.com/in/shivkumar3489

Portfolio: <https://sujalk348.github.io/>

PROFESSIONAL SUMMARY

Software Developer and B.Tech CSE-AIML graduate with hands-on experience building and deploying React Native applications using TypeScript, Firebase, Firestore and Node.js. Built a multi-role School ERP with role-based access, real-time data and 6+ modules, and developed AI projects using RAG, NLP, semantic search, vector embeddings and computer vision. Experienced across application development, API integration, database design, testing and production deployment.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Frontend / Mobile: React Native, React, Next.js, Expo

Backend: Node.js, REST APIs, Firebase Cloud Functions

Databases / Cloud: Firebase, Firestore, MySQL, MongoDB (familiar)

AI / ML: Machine Learning, NLP, RAG, Semantic Search, Vector Embeddings, Transformers, Computer Vision, OpenCV

Tools: Pandas, NumPy, Scikit-learn, Git, GitHub, VS Code, Jupyter Notebook

EXPERIENCE

Founder & Software Developer — StudXAI | Sep 2025 – Present

React Native · TypeScript · Firebase · Firestore · Next.js · EdTech SaaS

- Architected and built a multi-role School ERP mobile application in React Native and TypeScript with 4 role-based dashboards for students, teachers, administrators and super administrators; deployed to Google Play Store.
- Designed Firestore data models and implemented Firebase Authentication with role-based access control (RBAC) for secure application data access.
- Developed 6+ ERP modules covering attendance, marks management, student onboarding, academic calendar, teacher administration and push notifications.
- Engineered an AI tutoring capability using retrieval-augmented generation (RAG), semantic search and vector embeddings to support document-grounded student Q&A.
- Managed the product lifecycle across architecture, feature development, testing, cloud deployment and production maintenance.

PROJECTS

AI Tutor using Retrieval-Augmented Generation (RAG) | Oct – Nov 2025

Python · NLP · RAG · Transformers · Vector Embeddings · Semantic Search

- Built an AI tutoring system that retrieves relevant knowledge-base content through semantic search and vector embeddings before generating responses.
- Grounded generated answers in retrieved documents to improve relevance and reduce unsupported responses for curriculum-focused Q&A.

Smart AI Attendance System — Facial Recognition | Jan – Feb 2026

Python · OpenCV · face_recognition · Firebase · NumPy

- Built a real-time facial-recognition attendance system using OpenCV and Python, with a pipeline for face detection, encoding and identity verification.
- Integrated Firebase Firestore for attendance record storage and retrieval across enrolled student profiles.

EDUCATION

B.Tech — Computer Science Engineering (AI & ML) | Kurukshetra University, Haryana | 2022 – 2026

CERTIFICATIONS

Data Analytics Job Simulation — Deloitte (Forage) · Data Analysis with Python — IBM Cognitive Class · Data Science — Code with Harry
